the microscope

1982 VOL. 30 INDEXES

Editor: Walter C. McCrone

Published by
Microscope Publications
Chicago

The Microscope

SUBJECT INDEX

Volume 30

Acoustic microscope, 202
Actinomycetales, SEM, 200
Ammonium perchlorate, 255
Analytical tools for trace evidence, 105
Andesine, 17
Archaeolog. microscopy,211
Asbestos, 5, 223-228, 259, 267
Augite, 17
Automated birefringence measurement, 101

Birefringence measurement, automated, 101
Blood identification, 210
Bonding study, acoustic microscopy, 202
Botanical ident., 287
Bovine optic nerve, 171
Brass-coated steel wire, 213
Brucite, 263
Bumps vs holes, 68

Cadmium-109, x-ray analyzer, 198
Case histories, 1
Cement clinker, 229, 291
Characterization of trace evidence, 93, 101, 151, 163
Chrysotile, dyes for identification, 267
Coating problems, 208
Colloidal silica gradients 147
Color & pleochroism, 317
Contamination,
  Fiber, 2
  Metal cans, 211
Cotton dust, 223
Counting cell, 7
De Broglie, L., 11
Density gradient, 147
Dispersion staining, 1, 17, 210, 323
Dyes for chrysotile identification, 267
Dynaphot, 206

Electron microscope, 11, 247
Epimakroskop, 55
Escher, 72
Etch rates, cement phases, 229
Examination of trace evidence, 93, 101, 151, 163
Excalibr, 250
Explosives, 216
Exposure control, photomicrography, 208

Failure analysis, 1-2
Fatigue fractures, 139
Fiber characterization, 141
Forensic microscopy, 93, 105,151,163,210,215-217, 229,281
Fractography, 139
Fracture propagation, 141
Frei, Max, 163
FTIR, microscopically, 205

Glass spheres, 1

Hair examination, 151, 218, 219
Heinrich, E.O., 281
HMX, 249
Hypersthene, 17

Identification of soil minerals, 17
Illuminators, 1882, 182
Image analysis, 46
Image reconstitution, 76
Impossible triangle, 69
Infrared absorption, microscopically, 205,209
Insulation analysis, 5,223 259, 267
INTER/MICRO-82, 197
Invention of TEM, 11, 247

Knoll, M., 13, 247
Kohler illumination, 186

Labradorite, 17
Largefield microscope, 53
LEAA, 105
Leeuwenhoek, 171
Light-scanning photography 206

Magiscan-2, 46
Magnetic alignment, 5
Magnetic tapes, TEM, 200
Magnetite, 17
Marton, L., 11
Max Frei, 163
McCrone, W.C., 315
Microdensitometer, 43
Microscopy teaching, 131, 214
Microspectrofluorimetry, 210, 215
Microspectrophotometry, 213
Microthermal microscopy, 212
Mites, 176
MOLE, 203
Mounting media, new, 204

Nanospec, 213

100 Years Ago, 182
Optic nerve, bovine, 171
Optical crystallography 17, 203, 249

Particle analysis,SEM, 201
Particle association, 195
Particle characterization, 185, 201, 202, 204
Particle homogeneity, 195
Particle shape, 192
Particle size, 190
Particle surface, 194
Photomacrography, 209
Photomakroscop, 54
Photometric microscopy, 212
Photomicrography, 206, 208, 209
Physicist looks at microscopy, 65
Pleochroism, 318
Polar vibration direction 316
Polaroid SX-70, 50
Portland cement clinker, 229, 291
Proficiency testing, 105
Pseudoscience, 232
Pumice, 17

Quartz, 17

Raman microprobe, 203
Reflected light Schlieren microscopy, 222
Refractive index, 321
Rudenberg, R., 12, 247
Ruska, E., 247

Schlieren microscope, 35, 209, 222
Schlieren microscopy, reflected light, 222
Schneider, Albert, 93
Seed identification, 217
Selected area electron diffraction, 202
SEM, 139, 201, 207, 215
SEM, problems with textiles 207
Serology, 217
Shroud of Turin, 125, 220, 343
Slide ringing, 206
Slideless microscope, 199
Soil comparison, 17,166,229
Sperm, 147, 352

Spindle stage, 249
Spot welds, 202
St. Helens ash, 17, 81
Standards in microscopy, 199, 210
Steel wire, brass-coated, 213
Sticky tape, 163

Talc fibers, 260
Teaching microscopy, 131, 214
Textile fibers, 207, 215, 217
Textile microscopy, SEM, 207
Thin sections, 171
Tire cord, steel, 213
Trace evidence, 93,105,151 163,210,215-217,229,281
Transparency, 319
Trouble-shooting, 1-3
Turin Shroud, 125,220,343
Unusual cube, 72

Van Heurck, 182
Van Leeuwenhoek, 171
Vibration directions, 316
Volcanic ash, 17, 81

Water immersion objectives, 5
Wayne Williams case, 216
Wild epimakroskop, 55
Wild photomakroskop, 54
Wizard of Berkeley, 263
Wollastonite, 263

X-ray analyzer, 198
